

PSD

Procyberian's Distribution

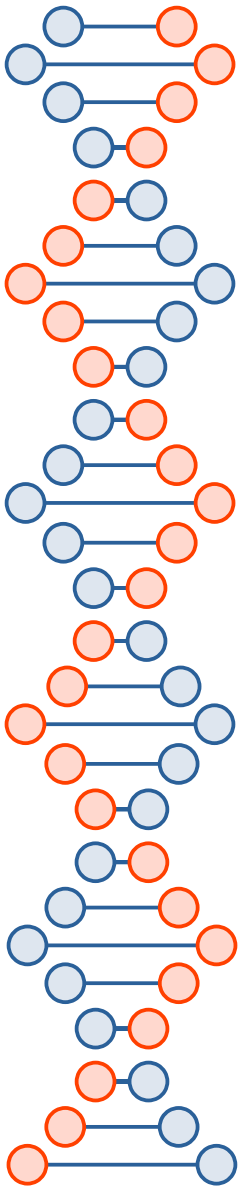

PSD

- Inside the dialectic of BSD, proprietary solutions and GNU approach.
- How to approach to the information to embrace newbies to become master of hacking !
- Why Procyberian Systems Distribution not only “system” ?
- A community for other communities a company for other companies. This is our culture !

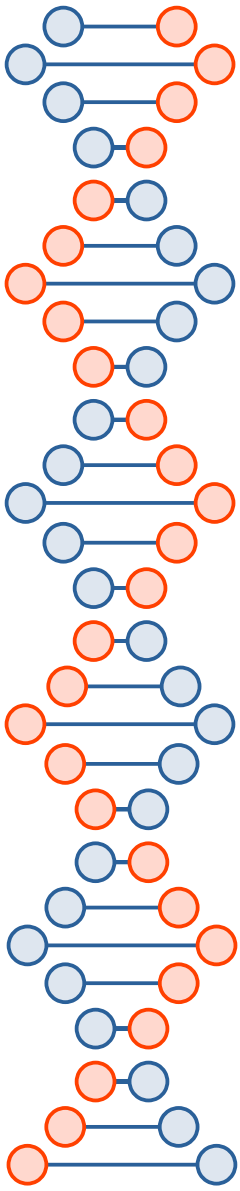

PSD

- Before start : PSD is an umbrella project.
- GNU/Linux is the first stable goal. We want to write more freedom respecting security software.
- GNU/Hurd is on the way.
- Also we want to learn from BSDs.
- AGPLv3-or-later to escape from vendor lock-in.

PSD

- Last say : PSD will always be freedom respecting and under control of community members.
